Does T&#252;rkiye have a green public procurement program?

T&#252;rkiye started implementing a green public procurement program for cement in early 2025. The government has placed a limit on the amount of clinker allowed in cement used for public construction projects, requiring public contracts to use cement with 20% clinker replacement through 2029 and 25% clinker replacement from 2030.

What does green procurement mean for the private sector?

In the private sector, it means leveraging companies' purchasing power to decarbonize their supply chains and investments. The past few years have seen several green procurement initiatives and policies for cement and steel introduced around the world.

How does EPA work with the cement sector?

EPA is the main agency that regulates the cement sector. The following links are intended to help Smart Sectors partners and the public learn more about how EPA works with the cement sector. ENERGY STAR resources -- ENERGY STAR is an EPA voluntary program that helps businesses and consumers save energy and money.

What are green procurement benchmarks?

Initiatives and policies around green procurement are increasingly based on "emissions-intensity" benchmarks; for example, how much CO<sub>2</sub> is released per ton of cement or steel produced. Such benchmarks help determine if a product meets certain standards or qualifies for a certification.

Learn about environmental resources for the cement and concrete sector.

High quality 120KW 30T / H Dry Mortar Plant Full Automatic Sand Cement Mix Equipment from China, China's leading product market Sand Cement ...
