Does Siemens Energy offer a pre-commissioned substation solution?

Depending on customer requirements Siemens Energy can deliver a fully pre-commissioned substation solution equipped with power transformers as well as high- and medium voltage, making it the most cost-effective solution to simplify your on-site schedule. Skid-mounted solutions can be delivered with GIS, AIS and Dead Tank arrangements.

Why should you choose Siemens traction power substations?

By integrating the equipment in a modular housing and undertaking rigorous testing off site, Siemens is able to supply fully built and tested modular traction power substations to a consistent and high level of quality. The state-of-the art equipment and connectivity allows optimal operations and transparency.

What is a DC traction substation?

These pre-fabricated and transportable substations contain all main equipment, station auxiliaries and the station control system. Hitachi Energy offers a broad range of DC traction substations for all types of applications including urban transport systems, suburban and mainline railways.

What is a container substation?

An intelligent solution for obtaining direct current quickly and economically is provided by container substations. By integrating the equipment in a modular housing and undertaking rigorous testing off site, Siemens is able to supply fully built and tested modular traction power substations to a consistent and high level of quality.

Telecommunication for utilities has a long history in the transmission level of the power supply system and Siemens was one of the first suppliers of communication systems for power ...

We are able to offer you fully customized power cabinets for your requirements. The enclosures are provided

with electrical equipment according to in-house designs or solutions developed ...

The Low Voltage Electrical Power Supply Distribution Switch Cabinet Enclosure is designed to house critical components in power distribution ...

The compact power blocks allow the connection of power cables at input or output of BESS sub-systems control panels such as PCS, central and solar inverters. They combine high ...

These pre-fabricated and transportable substations contain all main equipment, station auxiliaries and the station control system. Hitachi Energy offers a broad range of DC traction substations ...

This article will give you an overall introduction to substation cabinets and how to use it properly, also the precautions tips on the ...

Outdoor cabinets ensure network stability and protect communication equipment with reliable power management.

Over five decades, ZIV has been granted with the confidence of many power utilities that strongly value state of the art devices, backed by 100% in ...

By integrating the equipment in a modular housing and undertaking rigorous testing off site, Siemens is able to supply fully built and tested modular traction power substations to a ...

Explore essential communication equipment for substations, including RTUs, PLCs, fiber optic and wireless solutions. Learn about key ...

The unit is a bidirectional 400kW / 1500V / 500A DC/DC power converter cabinet solution. As a combined buck/boost air-cooled converter, it can be ...

Over five decades, ZIV has been granted with the confidence of many power utilities that strongly value state of the art devices, backed by 100% in-house development of PLC and ...

The UPS uninterruptible power supply and the DC operating power supply system together form a dedicated uninterruptible power supply for power plants and substations.

Rugged and modular RTU cabinet for substation automation. Ideal for RMU monitoring, fault detection, power measurement and SCADA communication.

Indoor control cabinets bring online monitoring possibilities of the transformer and the RMU's switches and
