How big is A 500KW solar power system?

A 500kW system using 370W panels will require about 2,369.9 square meters of roof to be installed. Each 370W panel measures about 1.75m x 1m. 500kW solar power systems are mostly suitable for Large industrial energy users or solar farms. This size of solar power system is classed as 'Large Scale'.

What is a P500E energy storage system?

The P500E has a modular design with a built-in STS and transformer. With the P500E, you can transfer energy bi-directionally to the battery, grid and DG, helping you to achieve more functionality and maximise the benefits of your energy storage system.

What is a P500L PV system?

The P500L has a modular design and its main role is to convert the DC power generated by the PV panels into AC power for integration into the grid or for local use. At the same time, the P500L is equipped with features such as Maximum Power Point Tracking (MPPT) to maximise the efficiency of the PV system.
