What is a data center server rack?

A data center server rack is critical for managing and organizing IT equipment. It supports hardware, enhances cooling, and ensures efficient power distribution. Choosing the right server rack involves understanding key dimensions, types, and features. This guide covers everything you need for making the best selection for your data center.

Where can I find DAMAC server racks?

Each data center serves unique purposes. You can find DAMAC server racks in colos, hyperscale data centers, edge data centers, cloud data centers and enterprise data centers. Need more info on how DAMAC server racks can work in your data center?

How tall is a server rack in a data center?

The most common height for server racks in data centers is 42U, which translates to a height of 73.5 inches. This size is preferred due to its ability to accommodate a significant amount of equipment while maintaining manageability, including rack unit indicators.

Where are data center custom server cabinets made?

AMCO Enclosures offers data center custom server cabinets, cases, cages, cable management, and PowerWhips products. All our custom data center network racks and server racks are manufactured right here in the USA at our facility in Des Plaines, IL. This includes data center custom server cabinets, cases, cages, cable management, and PowerWhips products.
