How much does a Bess battery cost?

Factoring in these costs from the beginning ensures there are no unexpected expenses when the battery reaches the end of its useful life. To better understand BESS costs, it's useful to look at the cost per kilowatt-hour (kWh) stored. As of recent data, the average cost of a BESS is approximately \$400-\$600 per kWh. Here's a simple breakdown:

Why did Bess toll prices drop in Q3?

Taken together, these factors - a weak summer in 2024, a more saturated ancillaries market, and a concern about the cannibalization of BESS's energy value - all likely contributed to lower BESS toll pricing in Q3. Have any questions?

Why did Bess toll prices fall 12%?

BESS toll prices posted to RenewaFi - both bids to buy and offers to sell - fell by about 12% from June to October. Several factors likely drove the decline. Weak Summer in 2024 Energy arbitrage is a key revenue stream for batteries. They can charge when power is relatively cheap and discharge when power is relatively expensive.
