-----  
Which portable power station should I buy?

If you want a portable power station that's lighter than our upgrade pick, often costs less, and adds a small light, and you don't mind that it has less power, a single handle, and fewer outlets and charging ports: Get the Jackery Explorer 880. It weighs 21.8 pounds, and has an ergonomic handle on top and a small light built into the side.

What is a portable power station?

Portable power stations are large batteries in protective boxes, with AC outlets and other charging ports built in.

Which portable power station has more outlets than Jackery explorer 300?

If you want a portable power station that has more outlets than the Jackery Explorer 300, often costs less, adds a light bar, and doubles as an uninterruptible power supply, and you don't mind that it's heavier and less powerful: Get the Anker Solix C300. It weighs 9.1 pounds, and it has a flat top and a long light bar.

How much weight can a power station carry?

Maximum weight of 50 pounds: Most portable power stations are too big and heavy for the average person to carry them for long distances on foot. We set a weight limit of 50 pounds, a heft that one (strong) person or two people can reasonably carry.
