What is an IP55 enclosure?

IP55 enclosures are designed to protect electrical equipment from dust and water in various industries like manufacturing and construction. These enclosures keep your equipment safe from harmful elements in tough environments. The IP code shows how well an enclosure protects against particles and liquids.

Are IP55 enclosures suitable for street use?

Yes, IP55 enclosures are appropriate for street use. They are designed to handle rain, splashes, wind-driven moisture, and general outdoor exposure within their declared operating limits.

Who makes NEMA rated IP55 enclosures?

Nema Enclosures manufactures quality custom and standard NEMA-rated IP55 enclosures. Contact us today to learn how we can expedite a custom enclosure and produce cost-effective standard NEMA-rated enclosures to protect your equipment. Questions?

Are IP55 enclosures safe?

Additionally, IP55 enclosures provide safety by preventing contact with the equipment inside. This protects both the equipment and anyone interacting with the enclosure from potential harm. IP55 enclosures come in a variety of durable materials, including aluminum, carbon steel, and stainless steel. Each material has its own benefits:

Making it suitable for use in environments where these conditions may be encountered, such as outdoors or in wet industrial environments. Is IP55 suitable for outdoor ...
