-----

The Republic of Congo is making notable progress in sustainability and energy development, with a range of ambitious projects aimed at expanding clean energy access, ...

EXMAR provides floating solutions across the energy project lifecycle - from engineering and construction to leasing, ownership and ...

Energy Dome, the startup commercialising a proprietary carbon dioxide-based long-duration energy storage (LDES) tech called the CO2 Battery, has secured investment into a grid-scale ...

Integrating energy storage systems with Congo's biomass energy projects significantly enhances energy reliability, 1. balancing supply and demand, 2. mitigating ...

Solar projects integrated with battery energy storage are becoming increasingly common in new African projects. Even commercial and industrial customers are installing them for baseload ...

The project calls for the construction of a 222-MW solar PV system and a 526-MWh battery energy storage system (BESS) that will provide 30 MW ...

Solar projects integrated with battery energy storage are becoming increasingly common in new African projects. Even commercial and ...

The large-scale development of energy storage technologies will address China's flexibility challenge in the power grid, enabling the high penetration of renewable sources.

Will battery storage grow in 2025? In the United States, the 2022 introduction of the Inflation Reduction Act

included an investment tax credit for stand-alone storage. Since then we have ...

As the Republic of Congo seeks to bolster its economic development, a series of transformative infrastructure projects are ...

Following similar pieces in 2022/23, we look at the biggest energy storage projects, lithium and non-lithium, that we've reported on in 2024.

Shenzhen Energy, a Shenzhen-listed company, is evaluating a major investment in a solar and power storage project in the Democratic Republic of Congo (DRC). This initiative ...

The Programme will support the development of three solar green mini-grid pilot projects, each with battery storage, aggregating to a capacity of around 30 MW in three towns in the ...

We give you a list of all the major building and construction projects currently under construction in DR Congo covering roads, rail, airports, sea ports, buildings, energy, housing ...

The Republic of Congo is making notable progress in sustainability and energy development, with a range of ambitious projects ...

The construction of energy storage infrastructure can disrupt natural habitats and lead to biodiversity loss, complicating the permitting ...
