What is a 47U rack cabinet?

47U rack cabinet houses, organizes and secures standard-width rack equipment in high-density server and IT networking areas.

What size is a 47U server cabinet?

Standard-Depth 47U Server Cabinet Accommodates 19 in. Rack Equipment This SmartRack® 47U rack enclosure is designed for network wiring closets, retail locations, classrooms, back offices and other areas with essential rack-mount IT equipment.

What is a 47U server rack?

47U server racks and floor standing data cabinets from Server Room Environments are one of the largest available and are designed to provide a complete and secure protective enclosure system for servers, IoT, Edge computing and networking devices. The 47U rack range includes budget and premium models which can be tailored for site applications.

How tall should a 47U rack be?

A 47U rack or cabinet can house equipment whose total height when placed into the rack is no more than 2.09m. Care therefore has to be taken when selecting a rack to make sure that their cabinet height is sufficient to house the IT server, networking peripheral or IoT device. For reference 1U=1.75inches or 44.45mm.

The construction of all cabinets has been designed with the smallest in mind details so that their assembly and operation are carried out at a high level of safety and comfort.

The 47U rack range includes budget and premium models which can be tailored for site applications. With internal depths from 600-1200mm, these 47U racks are designed to house ...
