With EUR279 million in EU funding approved for 1500MWh of new energy storage capacity, the country is set to double its current ...

CNTE's C& I energy storage initiative has been successfully deployed in Brno, Czech Republic, facilitating a green transformation for ...

A project combining gas turbines and battery energy storage system (BESS) technology in the Czech Republic has been put into commercial operation, the largest in the country.

In 2019, this capacity represented approximately 93% of U.S. utility-scale energy storage power capacity and approximately 99% of U.S. energy storage capability [2]. PSH functions as an ...

In a powerful symbol of the ongoing energy transition, Czech energy company CEZ is pioneering a 4MW to 8MW energy storage project at a former mineshaft in the Ostrava region.

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the increasing integration of energy storage ...

In an announcement released on March 7, 2025, the executive arm of the European Union said that the Czech scheme will support the installation of at least 1.5 GWh of ...

Boosting energy storage will allow Czechia to improve its energy security and reduce reliance on gas and coal imports, two key sources in its current energy mix. Moreover, ...

This event will bring together key stakeholders from across the region to explore the latest trends in energy
