What is a Vertiv EnergyCore Battery Cabinet?

Vertiv unveiled its innovative Vertiv EnergyCore battery cabinets to address the growing demand for solutions that support high-density computing in increasingly crowded data center environments.

Should a data center use a battery system?

In return for this large cost the system has a very long battery run time and has the ability to accept a very large increase in load. The average data center is entitled to a 75% savings in battery life cycle costs. If the battery system could simply be matched to the initial load and then expanded as needed, this cost could be avoided.

How many Vertiv EnergyCore cabinets does a Liebert APM2 need?

The 250kW Vertiv Liebert APM2 requires just a single Vertiv EnergyCore cabinet, while the 500kW Liebert APM2 can be supported by two Vertiv EnergyCore battery cabinets at five minutes end of life.

Can a data center save money on battery life cycle costs?

The average data center is entitled to a 75% savings in battery life cycle costs. If the battery system could simply be matched to the initial load and then expanded as needed, this cost could be avoided. See White Paper 37, Avoiding Costs from Oversizing Data Center and Network Room Infrastructure for more information on this subject.
