How will renewables affect Costa Rica's energy system?

Both renewable scenarios will result in a high proportion of variable power generation (PV and wind): 33%-31% by 2030 and 54%-66% by 2050. Such a varied mix of renewables will make Costa Rica's energy system more resilient, efficient and affordable.

What is the energy system like in Costa Rica?

Currently, the energy system in Costa Rica is heavily centralised, with the Costa Rican Electricity Institute (ICE), the state-owned power and telecoms provider, by law being the only actor obligated to provide electricity to all sectors and parts of the country.

Where is economic activity concentrated in Costa Rica?

Economic activity is concentrated in and around San José. In order to strengthen local economies in rural regions of Costa Rica, it is necessary to unleash the transformative power of renewable energy to strengthen economic activities.

Is solar power a new energy source in Costa Rica?

Like wind power, solar power is another newer energy source in the country. The first solar power projects in the country were established in 1978 by just a few researchers from public universities at the Solar Power Laboratory at the National University. During 2012, Costa Rica inaugurated the Miravalles Solar Plant next to the Miravalles Volcano.

Energy storage project opens in Costa Rica. The system uses solar panels to charge batteries during periods of lower energy cost and then, subsequently 4.3 MWh battery storage system (BESS). ...

Costa Rica is an emerging leader in distributed renewable generation. The market combines robust legal backing, growing demand, and strong public and institutional support for clean ...
