-----  
What are the requirements for emergency lighting systems?

Construction laws, labour laws, and EU regulations on lighting technology and workplace lighting therefore contain normative specifications for both the design of emergency lighting systems - including their standby power supply, batteries, light fittings and switchgears- and for the functional tests that must be performed regularly.

What are emergency lighting products?

Our emergency lighting product range covers exit lights, emergency lights, central battery systems, emergency lighting monitoring systems and central monitoring softwares, control electronics, spare parts and much more.

What are emergency lighting systems?

Emergency lighting systems provide the necessary level of illumination by automatically switching on in case of a mains malfunction or power outage without the need for a generator. There are two main subtypes of such systems.

How bright is an emergency lighting unit?

Answer: Emergency lighting unit solutions are designed to provide a minimum brightness level of 1 lux on escape routes and 0.5 lux in open areas. That is a somewhat low level of brightness but it is normal for the lamp to appear dim in emergency mode.
