---

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. ...

Discover the largest battery storage projects in the U.S. for 2025, including Darden, Bellefield, and Swiftsure.

Introduction Pumped storage hydropower (PSH) is a proven energy storage technology. Its earliest U.S. operations date back to the 1929 commissioning of the Rocky River PSH project ...

Energy storage is essential to a resilient grid and clean energy system. Learn about the types of energy storage, available incentives, and more.

The challenge is to introduce two hands-on supplemental projects: the energy storage system (ESS) and the motor system. Each project is considered low voltage (LV) for safety and ...

SCG, in collaboration with Toyota Motor Corporation (TMC), Toyota Motor Asia (TMA), Toyota Tsusho Corporation (TTC), and other partner companies, has announced the ...

In many primary-equipment projects, energy-storage motor control circuits are still built from discrete devices -- a relay here, a contactor there, maybe a timer or a thermal ...

The project: - Is based on a cohesive and realistic strategy including research plan, critical path items, risk mitigation, and timeline to achieving desired outcomes - Is based on sound ...

High-voltage energy-storage control should no longer depend on discrete wiring and manual adjustments. With integrated logic, configurable protection, and standardized ...

The United States flywheel energy storage motor market is experiencing significant growth driven by advancements in energy storage technologies, increasing demand for ...

GM and Redwood are repurposing EV batteries into energy storage to help power AI data centers and boost US grid resilience.

JSW MG Motor With LICO Material: JSW MG Motor India, with LICO Materials, announces a Battery Energy Storage System under ...

The ACES program, a partnership between the Massachusetts Clean Energy Center (MassCEC) and the state Department of Energy Resources ...

The New York project includes the deployment of a 5MW / 20MWh standalone energy storage system, designed to support grid reliability, peak-shaving, and market ...

This project validates advanced controls for active power from wind generation, short-term energy storage, and large industrial motor drives for various types of ancillary grid services.

These innovative CO2 batteries from Energy Dome promise long-duration energy storage for the grid, and reliable 24/7 clean power for data centers.
