-----

Tesla has signed its first deal to build a grid-scale battery power plant in China amid a strained trading relationship between Beijing and Washington.

With the unique advantages of sodium-ion battery technology, resources, and safety, the station provides a new pathway to address the challenges of renewable energy integration and injects ...

As the first large-capacity sodium-ion energy storage power station in China, after completing the technical validation "from 0 to 1", it has achieved a key leap towards large-scale application ...

China's first large-scale sodium-ion battery energy storage station officially commenced operations on Saturday. The station will help improve peak energy management ...

China's first large-scale sodium-ion battery energy storage station officially commenced operations on Saturday. The station will help ...

The problem of solar and wind curtailment can be effectively solved, and power supply reliability can be improved through the system integration ...

The company describes the project as the first large-scale and commercial application of large-capacity sodium-ion energy storage ...

China has launched its first large-scale sodium-ion battery energy storage station with a capacity of 10 megawatt-hours (MWh) in Nanning, Guangxi. This marks the first ...

On October 10, 2025, China's first large-scale lithium-ion battery energy storage power station commenced

operations in Guangxi Province. This project, which is located in the Nanning ...

NANJING, Feb. 14 -- At an energy storage station in eastern Chinese city of Nanjing, a total of 88 white battery cartridges with a storage capacity of nearly 200,000 kilowatt-hours are ...

On Sunday, China launched its first large-scale lithium-sodium hybrid energy storage station, the Baochi Energy Storage Station, in Yunnan Province.

As China's first large-capacity sodium-ion battery energy storage station, this project is part of the national key research and development plan focusing on "hundred-megawatt-hour-level ...

The project represents the first phase of the Datang Hubei Sodium Ion New Energy Storage Power Station, which consists of 42 ...

The world's first intelligent grid-forming photovoltaic and energy storage power station, tailored for ultra-high altitudes, low-temperatures ...

A 10-MWh sodium-ion battery energy storage station has been put into operation in Guangxi, southwest China, the country's first ...

Energiasalv has published an invitation to tender on the international platform, Merccell. The tender is for constructing and designing a 500-megawatt underground pumped ...
