Will LG supply LFP pouch-type EV batteries to ampere?

SEOUL, July 2, 2024 - LG Energy Solution (KRX: 373220) today announced that it will supply LFP pouch-type EV batteries to Ampere, the EV pure player born from Renault Group, its long-time customer.

When will LFP batteries be available to ampere?

Under the five-year contract, LG Energy Solution will provide LFP batteries to Ampere from late 2025 through 2030, with a total capacity of approximately 39GWh, enough amount to produce around 590,000 battery electric vehicles.

Will LFP batteries be available for Renault & Alpine models?

The existing supplier LG Energy Solutions will contribute both NMC and LFP battery cells from Poland. "These two partners will provide Ampere with LFP batteries that will equip several models of Renault and Alpine brands and will cover battery needs for this technology until 2030," it says.

Where are NCM and LFP batteries made?

LGES for both NCM and LFP batteries, built in their plant in Poland. Batteries are assembled at Ampere ElectriCity (France), in the Assembly Battery Shop of Douai Manufacture. Thanks to progress made in LFP technology over the past few years and the development of the value chain in Europe, LFP technology is now a real alternative to NCM.

The cathode of a LiFePO₄ battery pack is composed of lithium iron phosphate, which has an olivine - type crystal structure. This structure consists of a three - dimensional ...

Lithium iron phosphate battery packs excel in thermal and chemical stability, greatly reducing the safety risks of batteries under extreme conditions. This high safety feature ...
