-----  
How many battery factories are there in the United States?

Today there are about 34 battery factories either planned, under construction, or operational in the country. Former U.S. President Joe Biden's Inflation Reduction Act (IRA), signed into law August 16, 2022, might not have been the initial catalyst behind the onshoring battery factory trend.

Who makes SK batteries?

South Korean battery manufacturer SK On has created joint ventures to develop batteries with Ford and Hyundai. The company's U.S. subsidiary, SK Battery America, has its own plans. SK Battery America has invested \$2.6 billion into two manufacturing plants in Jackson County, Georgia, and reached mass production in early 2022.

Where will EV batteries be made in 2026?

The reshoring and building of a domestic lithium battery supply chain is in full swing in the U.S., with a bevy of new EV battery manufacturing plants and factories coming online by 2026. #1 - Tesla Gigafactory Nevada will be the largest EV battery factory in the U.S. in 2025 with an expanded capacity of 100 GWh (up from 37 GWh).

Does VW have a battery factory in Canada?

While VW's battery factory is in Canada and not technically in the U.S., it should still be eligible to receive Inflation Reduction Act incentives. Volvo has a battery assembly factory in Charleston, South Carolina, but the automaker does not manufacture batteries or battery components there.

This is a list of all lithium battery gigafactories in the U.S. and the major ones worldwide. A large gigafactory can consume 2.4 GWh of electricity and 1 million gallons of water daily.

Keytec provides new battery cabinets for single and 3-phase UPS's (Liebert, Mitsubishi, APC, Toshiba,
