How much does a substation cost?

The cost for a substation depends on the maximum power of the charging point and is 10,000 EUR per charging point with 150kW and 5000 EUR for 50kW, respectively (Funke, 2018). For a charging point with 100kW, we assume a cost of 7500 EUR. This cost is not assumed to decrease either, since the technology is already mature.

How do I determine the cost of building a substation?

Assumes the land is flat and barren (with no vegetation). - No site obstructions (i.e. easy to grade) - No wetland or floodplain remediation. This is a comprehensive tool to determine the cost of building a substation or any small portion of it. All material cost is populated. Enter the quantity for an estimate.

What is a battery cabinet / rack?

EverExceed designs customized battery cabinets / racks for individual batteries. The cabinet or racking system can be specified to accommodate any battery cell. From flooded to sealed, from lead acid to nickel cadmium and from vertical to horizontal all kinds of battery cabinet / rack can be designed flexibly to save the space in battery room.

What are everexceed battery cabinets?

EverExceed Battery cabinets are engineered for an uninterrupted power backup source to support the continuous operation of the higher and new requirements of these application backup.
