How much does a commercial EV charging station cost?

Commercial EV charging station installation costs typically range from \$3,000-\$13,000 per port for Level 2 stations and \$30,000-\$140,000 per port for DC fast charging. Total costs depend on equipment selection, electrical infrastructure requirements, site preparation needs, and local permit fees.

How much does a 240V charging station cost?

Level 2 charging stations (240V) work best for most commercial properties where vehicles park for 2+ hours. These provide 25-40 miles of range per hour and cost \$3,000-\$13,000 per port installed. DC fast charging suits high-turnover locations but costs \$30,000-\$140,000 per port.

How much does a commercial charging port cost?

A study by ChargePoint revealed that 73% of commercial properties spend between \$5,000-\$25,000 per charging port for Level 2 installations, while DC fast charging projects average \$75,000-\$125,000 per port.

What are the best EV charging stations?

ChargePoint, one of the top EV charging station manufacturers, offers a wide range of both DC and AC charging stations. Their ChargeExpress 200 retails for \$38,500. It is a 50kW DC fast charging station that offers a charge of 200 miles per hour. By comparison, their Gateway commercial models range in price from \$4,505 to over \$8,200.

It is a 50kW DC fast charging station that offers a charge of 200 miles per hour. By comparison, their Gateway commercial models range in price from \$4,505 to over \$8,200.

Discover the true commercial EV charging station cost, including Level 2 and DC fast charger pricing, installation fees, and ROI for your business.
