How much does a solar air conditioner cost?

It's an air conditioner powered by energy harvested from the sun. It is sustainable, and with every year that passes, solar energy becomes more affordable. Current cost averages \$2.50 to \$3.00 per watt. A 6,000 watt system costs about \$15,000 to \$18,000 for panels, battery, inverter and wiring.

What is a solar-powered air conditioner?

A solar-powered air conditioner--also called a solar air conditioner or solar AC for short--uses solar energy to power your air conditioner and cool your home.

Are solar-powered air conditioners worth it?

Solar-powered air conditioners come with many benefits that make them worth your while. The only main downside is the upfront cost, but even then, you'll save more money in the long run by switching to solar energy (more on this below). With that said, here are the benefits of solar air conditioners: They're better for the environment.
