How do I choose a server rack solution?

For help assessing your needs and choosing a server rack solution,contact your local Vertiv sales representative or visit our interactive product selector. Choosing the best server racks for your network infrastructure is crucial for optimizing performance and cost. Explore our range of server racks designed to meet your current and future needs.

How big is a server rack?

A rack unit measures 1.75 inches (44.45 mm). Server racks can range from 1U types,typical of small home or office wall-mount racks,to large 48U enclosures intended for high-density data center operations. The most common server rack size is 42U height and 19-inch width,but external measurements depend on the manufacturer and server rack model.

Which server rack should I Choose?

If your setup will be in a shared space,dusty area,or unsecured room,an enclosed server rackis the best choice. These provide enhanced security,dust protection,and controlled airflow. On the other hand,if you're working in a secure,climate-controlled data center,an open-frame rack may suffice.

What is a network rack?

A network rack (also called a server rack) holds networking equipment such as servers, modems, uninterruptible power supply (UPS) units, routers, network switches, and audio and video equipment. Server racks can be a specialized computer case, wall-mount rack, standing frame, or server cabinet designed to enclose networking equipment.
