Why is the energy storage industry important?

"The energy storage industry is providing essential power when needed most while boosting domestic manufacturing and creating jobs across the country," said Jason Grumet, CEO of ACP.

How is the energy storage industry preparing for a grid-scale energy storage supply chain?

The energy storage industry is making significant progress in laying the groundwork for a domestic battery energy storage supply chain, building or expanding more than 25 manufacturing facilities for grid-scale energy storage. With today's investment commitment, the industry has announced plans to rapidly expand ongoing efforts.

Is lithium ion the future of industrial energy storage?

Lithium-ion retained an 80.2% share of the commercial industrial energy storage market in 2024, but sodium-ion is forecast to expand at a 37.8% CAGR to 2030 as buyers prioritize supply-chain security over energy density.

Why should we invest in a US energy supply chain?

"Our manufacturing facilities in Utah, Texas, Tennessee, and Arizona support more reliable and cost-effective energy production while creating a resilient U.S. supply chain that advances American innovation, jobs, and energy security. These investments are about building the future of energy--right here in the United States."
