How much do solar panels cost in Japan?

The government encourages new detached houses to install solar panels, and subsidies greatly help reduce the costs of installing solar panels. Currently, the average price for a solar panel in Japan ranges from 200,000 to 400,000 yen per kilowatt(kW). Are there subsidies for installing solar panels in Japan?

What are Japan's solar energy subsidies?

The Japanese government has created the following subsidies for residents that are shifting toward solar power systems: This subsidy is for young couples or families with young children who want energy-efficient homes; the fund will contribute up to 600,000 yen for renovations and 64,000 yen for storage batteries.

Are solar panels required in Tokyo?

All new detached houses in Tokyo after April 2025 are required to have solar panels installed. However, if you are purchasing a property in a different part of Japan, it's possible that solar panels may not be mandated in the region.

How many kW is a solar panel in Japan?

5kW is the national average for installing solar panels in a home in Japan. The amount varies depending on the region and the property's roof size. The maximum for a household is 10kW. Do I need a storage battery with solar panels? While not necessary, storage batteries are highly recommended.

Explore Japan's FIP scheme for PV + storage and Tensor Energy's AI solutions to maximize financial returns.
