---

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid ...

Ukrainian private utility DTEK has energised the largest battery storage project in the war-torn country and one of the biggest ones in Eastern Europe. The 200 MW/400 MWh ...

The proposed 10kWh stacked battery storage system provides appropriate solutions to both problems, availing reliable backup power suitable for a small villa and ensuring uninterrupted ...

What is a containerized energy storage system?The Containerized energy storage system refers to large lithium energy storage systems installed in sturdy, portable shipping containers, which ...

FPR Portable BESS systems offer reliable, portable power for off-grid locations, RVs, emergencies, and home energy storage. With various ...

Our 1 GW project combines gas, solar, and battery storage to secure Kyiv's grid, cut emissions, and support critical services. Explore investment in this high-impact initiative.

The system works as a 560 W uninterrupted power supply (UPS) for grid power outages. The grid-compatible sine wave output ...

Marseille Energy Storage Power Station Project Built at the Marseille-Fos Port, the marine geothermal power station Thassalia is the first in France, and even in Europe, to use the sea's ...

Three months ago, a 72MWh BESS (Battery Energy Storage System) went operational near Lviv. Acting as both frequency regulator and emergency backup, this facility can power 15,000 ...

"A city's energy resilience starts with smart storage," says Dr. Oleksiy Petrov, lead researcher at the Kyiv Energy Institute. "Our 2023 study shows storage systems can reduce grid instability ..."

Portable power storage empowers users to maintain productivity during power outages, work in remote locations, and pair with renewable sources like solar panels--ushering in a new era of ...

The system works as a 560 W uninterruptible power supply (UPS) for grid power outages. The grid-compatible sine wave output makes the unit especially suitable for high ...

OverviewSpecificationsHistoryMain characteristicsReconstructionThe building of the pumped-storage power plant is connected with the upper basin by 6-pressure reinforced concrete and metal pipelines with a diameter of 3.8 m. The upper basin was created at a height of 70 m above the level of the Kyiv reservoir with a useful volume - 3700000 cubic meters, where during the night decrease in energy consumption in the power system water is pumped. The upper reservoir is discharged in the evening hours at the ti...

Summary: Discover the strategic location of Kyiv's cutting-edge energy storage power station and its role in Ukraine's renewable energy transition. Learn how large-scale storage solutions ...

At 2025's EcoEnergy Expo Kyiv, Lithium Valley featured energy storage products spanning industrial, commercial, microgrid, and home scenarios. Key specs and highlights: SC261L ...

The Kyiv Pumped Storage Power Plant (PSPP) (Ukrainian: Кіївська підземна гідроелектростанція (КПСС)) is a pumped-storage power station on the west bank of the Kyiv ...
