Australia's push towards renewable energy has seen a sharp increase in utility-scale Battery Energy Storage Systems (BESS) projects. In 2023, ...

Australia's push towards renewable energy has seen a sharp increase in utility-scale Battery Energy Storage Systems (BESS) projects. In 2023, Australia saw the strongest year for new ...

There are a range of established energy storage technologies that can meet this need such as batteries and pumped hydro energy storage (PHES).

The first quarter of 2025 was the second best on record for investment in large-scale Battery Energy Storage Systems (BESS) in ...

This battery storage update includes summary data and visualizations on the capacity of large-scale battery storage systems by region and ownership ...

Overview Energy storage technologies, store energy either as electricity or heat/cold, so it can be used at a later time. With the growth in electric ...

Grid-scale batteries are envisaged to store up excess renewable electricity and re-release it later. Grid-scale battery costs are ...

A new report published by Australia's Commonwealth Scientific and Industrial Research Organisation (CSIRO) has found that large-scale battery energy storage system ...

We propose a multimescale storage solution consisting of three storage categories and an interconnector between Australia's eastern and western grids. ...

Strengths within the Australian energy storage battery market for telecom applications are anchored in its strategic demand drivers, notably the rapid expansion of Australia's ...

Clean Energy Council Chief Policy and Impact Officer, Arron Wood, said it was encouraging to see sustained momentum in investment ...

According to the draft 2024/25 GenCost report - released on Monday - the price of battery storage has plunged more than 20 per cent in the last 12 months - echoing recent ...

According to the draft 2024/25 GenCost report - released on Monday - the price of battery storage has plunged more than 20 per cent ...

Each year, CSIRO, and the Australian Energy Market Operator (AEMO), collaborate with industry stakeholders to update GenCost, a leading ...

According to Clean Energy Council, there were 30 large-scale batteries under construction by the end of 2021, representing more than ...

According to Clean Energy Council, there were 30 large-scale batteries under construction by the end of 2021, representing more than 921 MW of new storage capacity. The ...
