The first battery, Volta's cell, was developed in 1800. 2 The U.S. pioneered large-scale energy storage with the Rocky River Pumped Storage plant in ...

Developers expect to bring more than 300 utility-scale battery storage projects on line in the United States by 2025, and around 50% of ...

About 73% of large-scale battery storage power capacity in the United States, representing 70% of energy capacity, was installed in states covered by independent system operators (ISOs) or ...

Texas and California continue to lead the market, with 61% of the total installed capacity in Q4, while the remaining 39% was installed across 13 states, expanding storage ...

Last year was fantastic for battery storage. This year is poised to be even better. The U.S. is set to plug over 18 gigawatts of new utility ...

German solar trade body BSW-Solar expects the capacity of large battery storage systems installed in Germany to increase fivefold by 2026. With 1.8 GWh of capacity installed ...

This battery storage update includes summary data and visualizations on the capacity of large-scale battery storage systems by region and ownership ...

Large-scale energy storage systems in the U.S. are expected to continue increasing throughout 2024, as championed by a handful of ...

Megapack is a utility-scale battery that provides reliable energy storage, to stabilize the grid and prevents

outages. Find out more about Megapack.

According to the U.S. Energy Information Administration (EIA), installed utility-scale battery storage capacity surpassed 15 GW in 2024 and is projected to more than double by ...

In May 2024, the United States large-scale energy storage market added 1081.4MW to the grid, a year-on-year increase of 637% and a month-on-month increase of ...

Data from market intelligence firm Rho Motion highlighted the US and Canada as the second largest regions, behind China, in globally installed battery energy capacity last ...

The U.S. DOE disbursed \$185M of American Recovery and Reinvestment Act funding to support 16 large-scale energy storage projects with a combined capacity of over 0.53 GW. 39

Around 100 new large-scale storage facilities with a capacity of around 0.8GWh went into operation in 2024, which corresponds to a doubling of the expansion compared to ...

The global energy storage market added 175.4 GWh of installed capacity in 2024, with the three major regional markets--China, the Americas, and Europe--continuing to ...

We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U.S. power grid in 2025 in our latest Preliminary Monthly Electric Generator ...
