The U.S. Solar Photovoltaic Database (USPVDB) provides the locations and array boundaries of U.S. front-of-the-meter, photovoltaic facilities, direct current capacity of 1 megawatt or more, ...

Guidance on designing and operating large-scale solar PV systems. Covers location, design, yield prediction, financing, construction, and maintenance.

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

Box plots and spaghetti diagrams of the area of digitized polygons for PV facilities shared across validation datasets and United States Large-Scale Solar Photovoltaic Database ...

The USPVDB is a detailed and comprehensive dataset of ground-mounted large-scale solar (LSS) photovoltaic energy facility locations and their attributes in the United States. ...

The USPVDB is a comprehensive dataset of U.S. large-scale solar PV energy project locations and characteristics that makes the data easier to access and more accurate ...

The scale of the impact of large-scale solar facilities on birds isn't well understood. Several of SETO's projects are using data-driven approaches ...

The distribution system is undergoing unprecedeted change, including the proliferation of distributed energy resources (DERs)--predomianately solar photovoltaics (PV) ...

The scale of the impact of large-scale solar facilities on birds isn't well understood. Several of SETO's projects are using data-driven approaches to study the issue.

An overview of how local governments can lay the groundwork for large-scale solar development, including how communities can integrate solar energy into their planning and zoning ...

The distribution system is undergoing unprecedeted change, including the proliferation of distributed energy resources ...

The new, large-scale solar database contains all ground-mounted commercial U.S. solar photovoltaic facilities with capacities of one megawatt or greater.
