What is the European Commission doing about energy storage?

The European Commission in 2020 published a study on energy storage, which summarized some previous studies and reports, explored current and potential energy storage markets in Europe, and set out policy and regulatory recommendations for energy storage.

How is the EU leading the way in energy storage?

The EU has developed a forward-thinking, supportive regulatory framework to encourage energy storage deployment as part of its ambitious clean energy and climate goals. Here's how the EU is leading the way: 1. Clean Energy for All Europeans Package

What does the EU's grids package mean for energy storage?

10 December 2025 -- Today, the European Commission published the Grids Package, addressing critical bottlenecks in grid connections, permitting, and infrastructure planning. These issues have hampered energy storage deployment and slowed the EU's decarbonisation and affordability ambitions.

What is Energy Storage Regulation (EU) 2019/943?

Electricity Regulation (EU) 2019/943: Sets market rules that encourage the use of energy storage to maintain grid stability, creating a dynamic environment where storage can compete on a level playing field. 2. Battery Regulation

While politicians and the public are currently focusing primarily on grid expansion, the potential of energy storage solutions remains largely unaddressed. The Centre for ...

The Rise of Energy Storage in Europe Energy storage is becoming increasingly critical for Europe. It supports the integration of renewable energy sources, enhances grid ...

The EU has developed a forward-thinking, supportive regulatory framework to encourage energy storage deployment as part of its ambitious clean energy and climate goals.

Cyprus has announced plans this week for the integration of its energy storage systems (ESS) with renewable energy sources.

CIDSAC, adopted by the European Commission in June 2025, marks a significant shift in industrial support policy, offering both CAPEX and OPEX subsidies for clean ...

The Great European Storage Stall: 2023's Plot Twist Last year, Europe added just 4.2GW of new storage capacity - a 38% drop from 2022's boom. That's like replacing Berlin's ...

With this paper, EUROBAT aims to contribute to the EU policy debate on climate and energy and explain the potential of Battery Energy Storage to enable the transition to a sustainable and ...

Let's face it: Europe's energy storage game is getting hotter than a Tesla battery during peak discharge. With operated battery storage capacity now exceeding 20GW [1], the ...

Starting from 2025, the new rules gradually introduce declaration requirements, performance classes and maximum limits on ...

The European Commission has announced a European Grid Package, to be launched in the final quarter of the year, which will focus ...

Discover the evolving policies and regulations of the European Union and United Kingdom, with both issuing landmark legislation in the ...

Discover the evolving policies and regulations of the European Union and United Kingdom, with both issuing landmark legislation in the energy storage.

Starting from 2025, the new rules gradually introduce declaration requirements, performance classes and maximum limits on the carbon footprint of electric vehicles, light ...

Let's face it - Europe's energy landscape has been more unpredictable than a weather forecast during hurricane season. Between phasing out fossil fuels and chasing ...

The Coalition aims at accelerating the decarbonisation of the European energy system by increasing the deployment of sustainable and clean energy storage solutions to support ...
