-----  
What is a lightning protection system?

A lightning protection system not only protects the solar PV system but also provides reliable protection to your entire property and assets while safely diverting transient currents to the ground.

Do you need a lightning protection system?

If you want to protect your investment, surge protection is not an option, it is a necessity, but if you want total protection and peace of mind, a lightning protection system can make the difference between the success and failure of large-scale solar power installations.

What is the purpose of a high-quality lightning protection system?

In all cases, the purpose of a high-quality lightning protection system is to: nVent ERICO has the experts, experience and technology options to select and design the ideal lightning protection solution for your application from the ground up. Learn more about the nVent ERICO Six Point Plan of Protection and our full family of products.

Can a lightning protection system work without a good grounding system?

A lightning protection system or expensive surge protective device (SPD) will not function properly without a good grounding system. A low-impedance grounding system may create hazards to personnel and equipment without proper bonding.

A battery swapping station refers to a facility where a large number of batteries are stored, charged, and uniformly distributed through ...

If you want to protect your investment, surge protection is not an option, it is a necessity, but if you want total protection and peace of mind, a lightning protection system can ...
