How big is the data center battery market?

The market for data center battery was valued at USD 3.4 billion in 2024 and is expected to reach around USD 5.9 billion by 2034, growing at 5.5% CAGR through 2034. Data center battery market was valued at USD 3.4 billion in 2024 and is estimated to grow at a CAGR of over 5.5% from 2025 to 2034 driven by growing advancements in battery technology.

What is a data center battery?

Energy storage systems are designed to save energy for later use in order to assist load balancing, peak shaving and integration of renewable energy sources. Based on data centers, the data center battery market is segmented into enterprise data centers, colocation data centers, hyperscale data centers, and edge data centers.

Will data center battery market grow in 2025?

The data center battery market in the U.S. is expected to experience significant and promising growth from 2025 to 2034. There is growth in data centers in North America as a result of technologies including cloud computing, AI, and IoT. They demand a constant flow of power that leads to growth in the battery market.

What are the top 5 companies in data center battery industry?

The top 5 companies of data center battery industry are Delta Electronics, East Penn, EnerSys, Leoch International Technology, and LG Energy Solution. They collectively hold a market share of around 30% in the market. EnerSys focuses on the development of innovative battery technology for data centers.

The Guardian system is comprised of Lithium Iron Phosphate with Graphite and Sodium mix this is 1914Ah at 51.2V totaling 41.4kWh of energy storage, with the leading Sol-Ark SA Limitless ...

APC Symmetra PX 100kW A high-efficiency 3-phase UPS scalable to 100 kW capacity. Suitable for small to medium data centers. Includes 8 power modules (SYPM10KF2), 8 battery modules ...
