What is the Hainan FTP policy?

The policy was first implemented as a pilot at the Yangpu Free Trade Port Zone in July 2021 and has since been gradually expanded to the whole island, powering the industrial development of the Hainan FTP.

What is a port microgrid?

The multiple energy assets owned by the port microgrid and its intelligence allow it to optimally shift the combinations of renewable generation, storage, dispatchable units, and grid assets to provide the most cost-effective means of supply power.

Why should Hong Kong invest in Hainan free trade port?

Hainan is currently in great need of capital and talent to drive its industrial development. Hong Kong companies not only have a great deal of experience in international business and financial development (which can act as a reference for the Hainan Free Trade Port), they also possess global talent and financial resources in abundance.

What is a smart port microgrid?

Energy: In the face of ever-increasing energy consumption and costs, a smart port microgrid provides a unique opportunity for integrating the latest smart grid technologies to improve energy functionality and enable advanced management and control of energy consumption [36, 37].
