---

Breakthroughs in battery technology are transforming the global energy landscape, fueling the transition to clean energy and reshaping industries from transportation to utilities. ...

In addition, a swath of 27 New York counties is designated as a U.S. National Science Foundation Energy Storage Engine in Upstate New York super-boosts this industry hub with a robust ...

China aims to further develop its new energy storage capacity, which is expected to advance from the initial stage of commercialization to large-scale development by 2025, with ...

US energy storage set a Q1 record in 2025 with 2 GW added, but looming policy changes could put that growth at serious risk.

This diverse resource includes energy storage that can provide dispatchable power on intra-day and/or multi-day time-scales, and includes various types of mechanical energy storage, ...

MITEI's three-year Future of Energy Storage study explored the role that energy storage can play in fighting climate change and in the global adoption of clean energy grids. Replacing fossil ...

With the rise of solar and wind capacity in the United States, the demand for battery storage continues to increase. The Inflation ...

The New York State Energy Research and Development Authority (NYSERDA) today announced over \$5 million is now available to support innovative energy storage ...

New York Gov. Kathy Hochul has launched New York's first bulk energy storage request for proposals (RFP), intended to procure 1 GW of bulk energy storage as part of New ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's ...

Abstract Renewable energy integration and decarbonization of world energy systems are made possible by the use of energy storage technologies. As a result, it provides ...

Smart, affordable, and resilient: New York State is investing in energy storage systems to help modernize the electric grid and reduce carbon ...

With innovations like their patented multi-sphere "pod" design, automated 3D-printed manufacturing, and shared infrastructure with other ...

In Massachusetts, the Governor signed a bill establishing new energy storage requirements in late 2024. The bill, S.B. 2967, adds ...

Chinese authorities unveiled several measures on Monday to promote the new-type energy storage manufacturing sector, as part of efforts to accelerate the development of ...

With the rise of solar and wind capacity in the United States, the demand for battery storage continues to increase. The Inflation Reduction Act (IRA) has also accelerated ...
