Are offshore wind farms a viable investment option in New Zealand?

Explore IEA wind cost data In 2022, the Government announced the development of regulatory settings to enable investment in offshore renewable energy (including offshore wind farms) in New Zealand.

How big is a wind turbine in New Zealand?

Turbines range in size from around 1 kW domestic units up to 15 MWwhich can be seen in prototype offshore wind farms. The largest capacity of a single wind turbine in New Zealand is 4.3 MW,situated at the Waipipi wind farm,which has a collective capacity across the farm of 133 MW.

Why is wind a useful resource in New Zealand?

High average wind speedsmake wind a useful generation resource in New Zealand. Currently,just over 6% of New Zealand's electricity is generated from wind turbines. This is projected to significantly increase in coming years with several wind farms under construction,planned or under investigation.

Why is wind generation quieter in New Zealand?

Improving technology and noise standards for turbineshave also made wind generation quieter. EECA is a member of the New Zealand Wind Energy Association, and the New Zealand Offshore Wind interest group, set up to explore potential benefits,options and barriers relating to offshore wind Energy in New Zealand.

After surveying almost 100 New Zealanders about their solar and battery installs, Mysolarquotes recently released "The Hidden Costs of Solar and Battery Systems in New ...

Learn about wind energy in New Zealand -- why our abundant wind resource makes it an efficient renewable energy source, with significant projected growth.

The PowerCrate is an all-in-one stand-alone power system designed and built by Powerhouse Wind. The
