Why should you choose a solar carport?

Our solar carport not only offers the possibility to power your electric vehicle fleet with 100% green energy, but also to conveniently and safely charge other batteries or battery-powered devices such as e-bikes and power tools and to use any electrical devices on site.

Does a solar carport need a license?

Statistics and live metrics can be viewed and analyzed directly and without delay . Since the solar carport is a stand-alone system, no registration with the Federal Network Agency is required: neither the integrated wallbox nor the photovoltaic system require approval or registration with the network operator*.

Can a solar carport charge electric cars?

The SP40/5-1 solar carport offers not only a sustainable solution for charging electric cars, but also a variety of other benefits for your everyday business needs. Thanks to its dimensions, the carport is also ideal for vehicles such as electric vans, flatbed trucks, minivans or high-roof station wagons (vehicle height max. 2 m).

Due to its independence from the public power grid, the SoloPort solar carport can be installed almost anywhere without the need for a sometimes expensive grid connection.

Explore the benefits and technology behind containerized off-grid solar storage systems. Learn how these scalable, cost-efficient solutions provide reliable power and energy ...

Discover Ecocapsule, the innovative, self-sustaining micro home designed for off-grid living. Enjoy eco-friendly, portable living ...

Discover how solar energy is shaping the future of telecom with ESTEL's solutions, reducing carbon emissions and ensuring sustainable ...
