Do you need a power hub for solar lighting?

Keep the lights on, wherever you are. No mains required. Solar lighting solutions Mains equivalent illumination for interior and exterior spaces where no grid power exists. Explore > Solar power hubs A reliable and robust solar hub to provide light and energy where no grid power exists. Explore >

Should I upgrade or expand my solar panel system?

Upgrading and expanding your existing solar panel system could be your answer. When it comes to solar energy, maximizing efficiency and optimizing performance are crucial.

Should I upgrade my solar system?

To determine if upgrading is the best option for your solar system, assess its performance, consider your energy needs, and consult with a professional solar installer. They can provide expert advice on optimizing your solar infrastructure and expanding its capacity to meet your evolving energy requirements.

Should you retrofit a solar energy system?

Let's say you've owned a solar energy system for several years, and over time, your energy needs have expanded. Whether you need more power to charge a new electric vehicle or because of increased home consumption (maybe you invested in a new heat pump), there are many reasons why people may want to retrofit an existing solar energy system.

Retrofitting is the industry term for upgrading or expanding an existing system, and it can mean adding new panels and Power Optimizers or even a new inverter to reach higher ...

To maintain high energy efficiency, the PV hub must be built with materials that provide excellent electrical conductivity, high thermal tolerance, and mechanical robustness.
