Does Panama have a flextool?

Panama has taken part in power sector activities under the Clean Energy Corridor Central America (CECCA), for which it is a pilot country. Country experts expect to use the FlexTool in scenarios and studies by ETESA, CND and SNE.

Does Panama need a cross-border electricity market?

In the absence of a cross-border electricity market, this interconnection was modelled assuming that Panama imports energy from Colombia at the high price of USD 200 per megawatt-hour (MWh). Because imports are likely the most expensive source of electricity, they will be required only if Panama's internal generation mix is unable to meet demand.

Why is the energy sector important in Panama?

In July 2024, the administration of Jos#233; Ra#250;l Mulino took office with a commitment to expanded economic growth and employment opportunities in Panama. The energy sector is a key area of focus and crucial for reaching the new government's goals and objectives.

What is the electricity transmission system in Panama?

Panama's electricity transmission system includes a set of 230 kilovolt (kV) and 115 kV high-voltage lines, substations, transformers and other elements necessary to transmit electricity through the SIN to different delivery points.
