What are energy storage procurement contracts?

Energy storage procurement contracts must also take into account the ever-evolving suite of laws and regulations applicable to energy storage projects, including as a result of the recent change in administration in the United States.

How much energy storage was deployed in 2024?

Approximately 11.9 gigawatts(GW) of storage was deployed in 2024. In only the third quarter of 2024, and despite mounting concerns over potential trade and policy developments, the US storage market added a record-setting 3.8 GW of energy storage--an 80% increase compared to the prior year.

What's new at DGS contract & procurement division?

DGS Contract and Procurement Division has partnered with OpenGov and is excited to announce our transition from a paper-based bid solicitation process to a fully automated, web-based electronic bidding and vendor management system. Our new e-procurement portal offers the following features:

Can solar photovoltaic systems survive a hurricane?

Solar Photovoltaic Systems in Hurricanes and Other Severe Weather - The U.S. Department of Energy Federal Energy Management Program is expanding its recommended design specifications to include factors and best practices for system survivability identified from 2017 hurricanes.

If you're an EPC contractor, project developer, or a caffeine-dependent engineer scrolling through yet another article on energy storage photovoltaic bidding documents, welcome!

Ever wondered how solar panels power your Netflix binge at midnight? Enter the photovoltaic energy storage device - the unsung hero that captures sunshine for rainy days ...
