What is an IP54 server cabinet?

An IP54 server cabinet from Lehmann IT offers excellent protection for your IT equipment against all external influences. In our range, you will find a wide selection of different models - from a simple wall-mounted enclosure to complex industrial cabinets. What are the benefits of an IP54 server cabinet?

How much protection does an IP54 server cabinet need?

For an IP54 server cabinet, a degree of protection of 4 provides good protection against splashing water. Since server cabinets are not submerged, this degree of protection is usually perfectly adequate. Splash water protection is particularly useful for industrial use. An IP54 server cabinet can be a perfectly sensible purchase for many sectors.

What is NEMA 4 rated secure computer cabinet?

NEMA 4 rated secure computer cabinet protects your standard sized desktop or tower PC in harsh Industrial environments. High security enclosure protects your large sized desktop or tower PC against theft or vandalism. Secure PC enclosure protects your standard sized desktop or tower PC against vandalism or theft.

How many devices can be stored in a server rack?

The total amount of equipment you can store in the cabinet depends on the height. To measure the height, the unit HE, for height unit, is used. 1 U equals a total of 44.45 millimeters and provides space for one IT device. Accordingly, a server rack with 20 U provides space for up to 20 devices.
