What is a 3KW power supply?

A 3kW power supply is a type of industrial power supply that typically operates in heavy-duty environments such as industrial plants and power utilities. It accepts a 480Vac, 3-phase line input and delivers any single output voltage between 24V and 600Vdc. A DC-input version, which accepts any voltage between 500V and 800Vdc, is also available.

What is a portable power supply?

A portable power supply is a device that can store and provide electrical energy for various purposes. It can power small appliances, charge electronic devices, or supply emergency backup power in case of a blackout. Portable power supplies are usually rechargeable and have different capacities and features depending on the intended use.
