How much does a solar battery cost in Australia?

Prices are influenced by brand, chemistry, installation type, and your existing solar system. To understand value, you must consider the cost per kWh of usable battery capacity. In Australia, the average solar battery price per kWh is \$900 to \$1,400 per kWh installed. This metric helps calculate value and compare brands effectively.

Are batteries worth it in Australia?

We've been tracking the financial return of batteries in Australia for over a decade and regularly update our analysis of whether batteries are worth it. At the midway point of 2025 was a key turning point in this equation as the federal battery rebate was introduced which offers a discount of around 30% for a typical 10kWh battery.

How can Australia reduce the cost of solar battery?

Australia offers various incentives that can significantly reduce the cost of solar battery: Federal Government's Cheaper Home Batteries Program (effective July 1, 2025): This national initiative offers an upfront discount of approximately 30% or up to \$372 per usable kWh of battery capacity.

How much do solar batteries cost?

Most homeowners pay \$7,000-\$15,000 depending on battery size and brand. Q2. Are solar batteries worth it in 2025? Yes -- with high electricity prices and low feed-in tariffs, they provide strong ROI.
