-----

Minister of Energy Sebastian Burduja signing 24 financing contracts for self-consumption solar and storage projects, worth nearly ...

Romania expects its overall energy storage to amount to at least 2.5 GW in operating power at the end of 2025, and to expand to as ...

By integrating on-site renewable energy generation and storage, Elmas is significantly reducing its dependence on fossil fuels, lowering energy costs, and contributing to ...

This power station will not only claim the title of the largest solar power plant in Europe, but its fully matched grid connected battery energy storage system also marks the ...

Econergy plans to equip every connected and ready-to-connect solar project in Romania with electricity storage capacity. The ...

The project's location was chosen for its infrastructure and logistics potential and will include a vocational training centre for solar energy. It is estimated to require 1,000 ...

Recently, the company completed the development of a solar power plant with an installed capacity of 23 MW.

The four solar parks in central and eastern Romania have more than 23 MW altogether in peak capacity. R.Power's contractors are Nomad Electric and Waldevar. The ...

Rezolv Energy and Monsson received all approvals from local authorities for the construction of Dama Solar.

The photovoltaic facility in western Romania will likely become the ...

This week, Vienna-based Energy has commissioned a major solar and storage site in northwestern Romania. The project consists of a ...

Nova Power & Gas's 400 MWh project in Cluj County is the largest battery energy storage system (BESS) to date to have been ...

Romania has reopened a competitive solicitation for battery storage for the grid integration of renewable energy, seeking "at least" 480MWh.

In Romania, the energy market is shared among five big electricity distributors: Electrica Furnizare, Enel Energie and Enel Energie ...

Overview of solar PV developments Following a period of lull, Romania has achieved in 2023 a significant milestone in its renewable energy journey - over 1 GW of new solar capacity ...

With a peak capacity of 1.04 GW and a battery energy storage system (BESS) of 500 MW, the project is set to become Europe's largest hybrid solar power plant. Graniceri ...

Econergy plans to equip every connected and ready-to-connect solar project in Romania with electricity storage capacity. The aim is to consolidate and expand its position in ...
