Where does Romania import electricity?

Romania exports and imports electricity to and from neighboring countries, including Hungary, Bulgaria, Serbia, Ukraine, and Moldova, and is also part of the European Union's internal energy market, which aims to create a single, competitive market for electricity and gas across EU member states.

Who produces electricity in Romania?

State-owned enterprises such as Nuclearelectrica, Hidroelectrică, Termoelectrică, Hunedoara Energy Complex (CEH), and Oltenia Energy Complex (CEO) are the primary producers of power. According to the National Energy Regulatory Agency (ANRE), the energy output in Romania in 2022 was 53 TWh (terawatt-hour), while imports were 5.9 TWh.

Is battery energy storage a pillar of Romania's energy transition?

Recent updates about investments in battery energy storage systems (BESS) in Romania indicate the technology is becoming another pillar of the country's energy transition alongside wind power. For several years now, photovoltaics, and prosumers in particular - including municipal authorities, have dominated the scene.

Who manages the electricity transmission system in Romania?

The electricity transmission system in Romania and the interconnection system with its neighboring countries is managed and operated by Transelectrica SA company (the Romanian TSO). They also manage the market operation, the grid and market infrastructure development, and the security of the national energy transmission system.

The world's leading data visualization tool for international trade data.

The National Energy System is taking important steps towards sustainability, with high-performance wind

turbines and ...

The clean energy sector in Romania is comprised of wind, hydro, nuclear, solar, and biomass energy mix.

In the next few years, with the maturity of battery energy storage technology, the improvement of market mechanism and the continuous inflow of multinational capital, the ...

Romania exports and imports electricity to and from neighboring countries, including Hungary, Bulgaria, Serbia, Ukraine, and Moldova, and is also part of the European ...

? Policy-Driven Boom Romania's energy storage sector is on fire in 2025! The government's 1.5 billion EUR non-refundable grant program for standalone battery storage ...

Discover all relevant Energy Storage Companies in Romania, including Prime Batteries Technology and Monsson Alma

Romania Energy Storage Market Synopsis The Romania Energy Storage Market is experiencing growth driven by increasing renewable energy integration, grid modernization efforts, and ...

" [The Eurowind Energy] contract marks the most significant storage project in our portfolio and consolidates the position of our ...

In a rising investment wave, firms in Romania are combining energy storage with solar, wind and hydropower or building standalone systems.

" [The Eurowind Energy] contract marks the most significant storage project in our portfolio and consolidates the position of our Renewable EPC by Allview division as a key ...

Romania expects its overall energy storage to amount to at least 2.5 GW in operating power at the end of 2025, and to expand to as ...

4. Evolution of Energy Import/Export in Romania: Net Electricity Production Mix Ambitious RES target assumed by the Romanian Government by 2030 boosts investments in ...

? Policy-Driven Boom Romania's energy storage sector is on fire in 2025! The government's 1.5 billion EUR non-refundable grant ...

Based on its renewable energy potential and considering the national energy sector's current characteristics - generation assets, interconnections, market design, ...

This study aims to study the energy strategy of Romania in correlation with the EU strategy in the turbulent period of pandemics and ...
