---

Solar, as well as storage, are among the fastest growing energy segments in the United States, with CS, also known as Community Distributed Generation (CDG), gaining popularity with ...

These publications--including technical reports, journal articles, conference papers, and posters--either focus on or were heavily informed by the Distributed Generation Market ...

To help meet the ever-rising demand for energy in the U.S., policymakers, regulators, and utilities should look to distributed energy resources (DERs) as a bigger part of ...

Explore the transformative potential of community solar and Distributed Energy Resources (DERs) in democratizing access to renewable energy. Learn how these innovative ...

Retail energy storage project development is concentrated in the NYC region; a region where there is not adequate land available for traditional community solar projects but where ...

The VDER mechanism was established in 2017 by the New York State Public Service Commission to incentivize distributed renewable generation development, particularly ...

For solar-plus-storage--the pairing of solar photovoltaic (PV) and energy storage technologies--NLR researchers study and quantify ...

Residential Solar (+Storage) Programs Residential solar+storage programs can facilitate the equitable and affordable adoption of these technologies, lower energy costs, and ...

About HASI HASI is an investor in sustainable infrastructure assets advancing the energy transition. With more than \$15 billion in managed assets, our investments are ...

Meanwhile, New York's Value of Distributed Energy Resources (VDER) mechanism provides a compensation model for the community solar and storage programs of ...

An optimally sized and placed ESS can facilitate peak energy demand fulfilment, enhance the benefits from the integration of renewables and distributed energy sources, aid ...

Decentralized storage networks represent a revolutionary step forward in how we store and share energy within our communities. By participating in these networks, ...

Picture a home with solar panels on the roof and a battery mounted on an exterior wall, storing energy from the solar panels during ...

From NYSERDA, the programme "provides financial incentives for the installation of new grid-connected distributed residential and nonresidential energy storage systems by ...

Distributed generation, also distributed energy, on-site generation (OSG), [1] or district/decentralized energy, is electrical generation and storage ...

Abstract This chapter provides a broad overview of current economic issues related to integrating distributed energy resources (DERs)--primarily solar photovoltaics (PV) ...
