---

As of 2021, the power and capacity of the largest individual battery storage system is an order of magnitude less than that of the largest pumped ...

China has brought a 1 GW offshore solar power plant online off the coast of Dongying, Shandong province, combining PV with energy storage and aquaculture in what is ...

Most big battery stations online and under construction are lithium-ion systems designed to discharge up to four hours of energy storage. They are frequently installed ...

Portable power stations are handy for backup power during outages, off-grid electricity for an RV, or simply charging your laptop and ...

Discover the best batteries for solar systems in 2025 and enhance your energy independence.

In total, new solar projects in 2025 are expected to make up more than 50% of the planned added utility-scale electric generation for 2025. Combined with planned battery ...

The Fengning Pumped Storage Power Station, the world's largest facility of its kind, has commenced full operations with the ...

The U.S. Department of Energy's Energy Information Administration (EIA) forecasts 32.5 GW ac of utility-scale solar capacity ...

The United States added 22,332 megawatts of power plant capacity in the first half of this year, and the vast majority of it was utility ...

This dataset offers a snapshot of where the U.S. power industry is heading -- and the direction is toward cleaner, cheaper energy ...

Stay powered on the go with the best portable power stations out there -- tried and tested by CNET's experts.

Discover the best portable power stations of 2025. Compare prices, features & performance to find the ideal unit for camping, backup, ...

"Energy storage was the second most deployed resource in Q1 2025, demonstrating its unique ability to be quickly built to address ...

Many utilities have embraced gas, or promoted restarting closed coal or nuclear plants, but that overlooks the cheapest and fastest-to-build option - solar energy combined ...

This dataset offers a snapshot of where the U.S. power industry is heading -- and the direction is toward cleaner, cheaper energy that mainly comes from solar and batteries.

Dozens of large-scale solar, wind, and storage projects will come online worldwide in 2025, representing several gigawatts of new capacity. The Oasis de Atacama in Chile will ...
