OverviewHistorySolar resourcesSolar photovoltaicsConcentrated solar powerSolar water heatingEffects on the global solar power industryGovernment incentivesChina is the largest market in the world for both photovoltaics (PV) and solar thermal energy. Its PV capacity crossed 1,000 gigawatt (one terawatt, 1 TW) in May 2025. By June 2025, China's PV capacity surpassed 1,100 gigawatt. In 2024, China added 277 gigawatts (GW) of solar power, which was equivalent to 15% of the world's total cumulative installed solar capacity.

China is changing the world's power game. In May 2025 its solar farms made over 100 terawatt-hours (TWh) in one month. That is ...

If China's "spare" solar capacity were put to use, they argued, it would enable the world to meet the goal -- agreed at the COP28 ...

China is the largest market in the world for both photovoltaics (PV) and solar thermal energy. Its PV capacity crossed 1,000 gigawatt (one terawatt, 1 ...

Therefore, we sincerely invite solar EPC companies, large-scale solar energy companies, small-scale solar energy companies, agents, and distributors ...

China is adding more solar and wind power to its energy grid than any other economy - but that huge buildout has its challenges. ...

According to Electrek, China's 3 gigawatt Mengxi Blue Ocean Photovoltaic Power Station in the vast, remote Gobi Desert came online in early November. The plant is located in ...

China installed more solar panels in power plants than on rooftops last year for the first time since 2020 as President Xi Jinping's ...

China is building 510 gigawatts of utility-scale solar and wind projects, according to data from the Global Energy Monitor, a non ...

According to Electrek, China's 3 gigawatt Mengxi Blue Ocean Photovoltaic Power Station in the vast, remote Gobi Desert came online ...

China has connected the world's first 1-GW offshore solar farm to the grid, a plant off Shandong set to generate 1.78 TWh per year.

China's solar and wind operating capacity has soared to 1.4 TW and now accounts for 44% of the world's operating utility-scale solar and wind capacity, more than the combined total of the ...

China is adding more solar and wind power to its energy grid than any other economy - but that huge buildout has its challenges. Here's what we can learn

The world's largest cluster of solar farms can be found in Qinghai, China, high on the remote Tibetan Plateau. It's far bigger than the USA's largest solar farm, and it's one of several ...

Country's largest mudflat solar photovoltaic energy storage facility combines salt production with photovoltaic power generation.

Overall, China's adoption of solar energy has transformed the global solar markets. Through its consistent funding, sustained ...
