OverviewSolar potentialHistorySolar photovoltaic powerConcentrated solar power (CSP)Government supportSee alsoFurther readingSolar power includes solar farms as well as local distributed generation, mostly on rooftops and increasingly from community solar arrays. In 2024, utility-scale solar power generated 219.8 terawatt-hours (TWh) in the United States. Total solar generation that year, including estimated small-scale photovoltaic generation, was 303.8 TWh. As of the end of 2024, the United States had 239 gigawatts (G...

We report that the most common on-site renewable energy technology deployed to date by partners in the working group is solar PV panels. Despite its prevalence, there are still many ...

This paper looks at the buildings that report onsite generation of renewable energy, including their type, location, and ENERGY STAR scores--as well as how they have changed over the past ...
