How small is a portable solar charger?

At just under seven inches, this portable solar charger is small enough to pack in your backpack, so toting it along on your next outdoor trip is a no-brainer. It also has an IPX5 rating, and in our testing, we found that it was rugged enough to handle exposure to light rain.

How do I choose a solar charger?

Connections: Make sure the solar charger is capable of charging the device you own and that it has enough ports to charge multiple devices if that is desired. Smaller electronic devices, like those you can usually charge with a USB, roughly need a 5V output rating. Larger electronics may require 12V-24V.

Which solar charger has a power bank?

But if you're looking for a model that includes a power bank, our pros suggest this 15-watt solar charger from SunJack. With a waterproof IP67 rating, this solar panel and battery pack combo is one of the most rugged picks you can find.

Can a portable solar charger charge multiple devices at once?

In addition to being able to charge multiple devices at once, it also offers wireless charging if your phone is Qi-enabled. At just under seven inches, this portable solar charger is small enough to pack in your backpack, so toting it along on your next outdoor trip is a no-brainer.
