---

Max Keiser interviewed Kevin Sara of Tenur Ltd, about the building of a solar power export project in Tunisia. The solar-thermal system uses mirrors to heat material from which ...

Tunisia signed agreements with Scatec and Aeolus to build 50 MW solar plants in Sidi Bouzid and Tozeur. The EUR79 million projects aim to help Tunisia achieve 35% renewable ...

Starting from 2014, government had to decrease the amount of subsidies. The British company TuNur Ltd proposed a major project in solar energy in 2010s, which would consist in building in ...

Four new projects granted Germany, Norway, France and Japan Tunisia short of solar target Tunisia has awarded four new solar ...

The importance of solar energy in Tunisia lies in its ability to address energy security, promote economic development, and combat climate change. Solar energy also contributes to ...

Tunisia has a target of generating 30% of its electricity from renewable energy sources by 2030. The south of the country, where our Adam and Tataouine power plants are located, is an ideal ...

With 97% of electricity production currently derived from gas, of which approximately half is imported, Tunisia has an urgent need for additional renewable energy ...

Average global horizontal irradiation is between 4.2 kWh per m<sup>2</sup>; per day in the north-west of Tunisia and 5.8 kWh per m<sup>2</sup>; pd in the extreme south. Given these favourable conditions, the ...

According to the Global Atlas of the International Renewable Energy Agency (IRENA), the annual power generation of solar photovoltaic systems ...

Given the criticality of assessing and selecting the most appropriate renewable technology, this current article seeks to develop a decision support mechanism using a ...

Located at latitude 36.8232 and longitude 10.1701, the city of Tunis in Tunisia is an exceptional site for solar photovoltaic (PV) power generation, given its substantial sunlight exposure ...

For instance, in 2022, Tunisia imported approximately 48% of its energy needs, primarily through natural gas, according to the World ...

Revised in November 2024, this map provides a detailed view of the energy sector in Tunisia. The locations of power generation facilities that are operating, under construction or planned are ...

With aims to install 1,700 MW of renewable energy capacity between 2024 and 2026, Tunisia has launched a number of international ...

The Government of Tunisia (GoT) has embarked on an ambitious path to increase its renewable energy production. Through the TERI UMBRELLA, the World Bank has been ...

The project consists of a 2,250 MW solar CSP (Concentrated Solar Power) plant in Sahara desert and a 2 GW HVDC (High-Voltage ...
