-----

China broke its own records for new solar and wind power last year, with installed capacity increasing by 18 and 45 percent, respectively.

„We've now got to the point that solar panel capacities planned for 2030 will be completed in 2024," L&#225;szl&#243; Gy&#246;rgy, the government commissioner for professional ...

The Kaposv&#225;r Photovoltaic Power Plant, located in Hungary, stands as a significant milestone in the country's renewable energy ...

The Hungarian government is promoting the expansion of storage capacities with a total of 230 billion forints (586 million euros) for private households and businesses. Important ...

Hungary's largest energy storage facility is currently under construction near Szolnok, with Chinese company Huawei involved in the solar energy project. The contract was ...

Hungary and China are joining forces to construct one of Central and Eastern Europe's largest solar energy storage facilities. The aim is to double Hungary's energy storage ...

Hungary's largest energy storage facility is currently under construction near Szolnok, with Chinese company Huawei involved in the ...

This is karida from CDS solar,we are the professional solar power storage factory in China and we have cost 5 billion RMB to build the best battery production line in China. We ...

This policy change enabled more households to invest in solar energy, directly contributing to the country's overall capacity increase. ...

It is one of the largest new energy power generation facilities in Hungary. At the end of 2023, the Tisafide photovoltaic power station ...

It is one of the largest new energy power generation facilities in Hungary. At the end of 2023, the Tisafide photovoltaic power station project in Hungary, jointly invested by ...

China has brought a 1 GW offshore solar power plant online off the coast of Dongying, Shandong province, combining PV with energy storage and aquaculture in what is ...

The addition of battery storage technology is crucial for managing the intermittent nature of solar power, allowing excess energy generated during sunny periods to be stored ...

Hungary switches on its largest battery energy storage system at Dunamenti gas power plant to support grid flexibility near Budapest.

In 2024, solar panels accounted for a quarter of Hungary's domestic electricity production, holding the highest share not only in ...

Recently, Chinese and Hungarian enterprises have joined hands and made solid steps in the development and utilization of solar energy resources. The two sides have jointly ...
