---

Broad development of solar power in Greece started in the 2000s, with installations of photovoltaic systems skyrocketing from 2009 because of the appealing feed-in tariffs introduced and the corresponding regulations for domestic applications of rooftop solar PV. However, funding the FITs created an unacceptable deficit of more than EUR500 million in the Greek &quot;Operator of Electr...

Discover sustainable energy options for your property in Greece with solar panels and off-grid solutions. Learn about green energy benefits and implementation.
